This application was originally filed with claims numbered 1-16 and 18. No original claim numbered 17 has been filed. Accordingly, under 37 CFR 1.126, original claims 1-16 and 18 have been renumbered as claims 1-17 consecutively.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows in order to provide an Abstract.

#### ABSTRACT

A multilayered pressure vessel fabricated from at least one single ply sheet of flexible material having an approximate longitudinal midline which divides the material into an inner portion having an inner surface, an outer surface, an edge, a seam allowance, and a width, and an outer portion having an inner surface, an outer surface, an edge, a seam allowance, and a width. The width of the outer portion is greater than the width of the inner portion. A primary seam binds the outer portion and the inner portion to the material sheet at the midline proximate the outer portion edge and inner portion edge. The sheet is wrapped into a continuous substantially 720 degree wrap to form a generally cylindrical vessel body having possible multiple fluid passageways, at the election of the user. The primary seam is concealed.

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to anticipate or properly render obvious a pressure vessel having a flexible sheet wrapped continuously approximately 720 degrees and the method of making by providing a pulling means and pulling the inner portion into the outer passageway at the proximate end while simultaneously turning the outer portion inside out by pulling its distal end over the increasingly overlapping outer and inner passageways.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
